Agho .I. Gracious

Web Developer · Creative Problem Solver · Remote-ready

Profile

Passionate web developer who builds **real, production-grade applications** – from full-stack e-commerce to real-time task managers. Certified Full Stack Developer (Bizmarrow, Abuja). I combine clean design with robust back-end logic and love solving complex problems. **Open to remote internships or junior roles** where I can add value immediately and grow with the team.

Featured Projects

📅 TaskForce – Real-Time Task Manager [Live → GitHub](#)

JavaScript · Firebase · PWA · Quill · IndexedDB

Production-grade task manager with real-time sync, file attachments, rich-text descriptions, Pomodoro timer, kanban board, recurring rules (RRULE), offline support, and full PWA capabilities.

🛍️ AURA – Full-Stack E-Commerce [Walkthrough → GitHub \(Private\)](#)

Django · DRF · PostgreSQL · Redis · Celery · Paystack · Tailwind

Full-featured women's fashion store: guest cart + login-required checkout, wishlist merge, Paystack webhook, product variants with stock, order tracking, PDF invoices, async email confirmations, and admin dashboard with sales stats.

📝 Elegant Django Blog [Live → GitHub](#)

Django · Python · PostgreSQL · Tailwind · Cloudinary · Render

Production blog platform: auth, rich text editing, post scheduling, comments/likes, categories/tags, persistent image hosting, dark/light mode, magazine-style layout.

☕ Hivey's Brew – Coffee Shop [Demo → GitHub](#)

HTML5 · CSS3 · JavaScript · LocalStorage

Fully responsive coffee shop site with shopping cart, blog, events page, and interactive gallery. Deployed via GitHub Pages.

Education & Learning

Full Stack Development Certification – Bizmarrow Technologies, Abuja (intensive front-end & back-end program)

Self-directed learner – continuously building full-stack apps, exploring advanced Django, React, Celery/Redis, and CI/CD (Netlify, Render).

Why Hire Me?

- ✅ **Ship real code:** every project is live, functional, and production-aware.
- ✅ **Fast & autonomous:** mastered full-stack tools, cloud deployment, and async workflows.
- ✅ **Detail & UX:** obsessed with clean interfaces, accessibility, and performance.
- ✅ **Remote ready:** excellent communication, self-starter, comfortable with async collaboration.
